

It has come to attention that you are considering replacing the current FM translator service with the low power FM. I am requesting the FCC to continue the current translator service. The current radio station that my family listens to is K-Love. This station has a possitive & encouraging message for not only our family but the whole community. There are few christian radio stations we would be able to receive a clear signal. Christian radio helps to support our family and community with the values and morals we try so diligently to inforce on a daily basis. If LPFM were to displace K-Love, our alternative is music the tears down our family values. This is why I believe is is in the best public interest to continue with current FM translataor service. The impact K-Love has on our families is extremely valuable to our physical, emotional, and spiritual well being.
